

SHINJUKU

Queue of upcoming customers / locations

Build a rail and shopping conglomerate in Tokyo

Strategic Network building

Connect stores with rail

Pick up and deliver
Customers to your stores

Each turn...

Place customers
on map

The number of customers in the queue
increases as Department Stores
are built to accelerate the game.

Take 2 actions:

Open store

Expand rail

Upgrade to
Department Store

Department
stores match
all customer
types

Ignore stores
that don't match
customers

and one
here too

Draw Income
(more cards)

CARD-BASED ECONOMY

Each card is a region of Tokyo
with multiple stations
Card distribution based on
Tokyo population

Draw cards as Income
Play matching card
to perform action in location
Build store in location to make
those cards Wild for you

Scoring based on collecting
sets of all 4 customer types

Move customers

When you move
through others'
track, they gain
income (cards).

Give 1 customer
to store owner if
it matches

Pass through
empty stations

Select starting
station

Take all
customers
in region

TOKYO FUN FACTS

Tokyo's rail system
is not managed by
a single entity.

Private companies run
different portions of
Tokyo's rail network.

Many rail companies also
own large department
stores throughout Tokyo.
