## Shinjuku

Revision 1

While it does not impact the core game, there is one update to the map that affects Shinjuku expansions that care about ward adjacency (e.g., *Angry Kaiju* and *Busy Chaiman*).

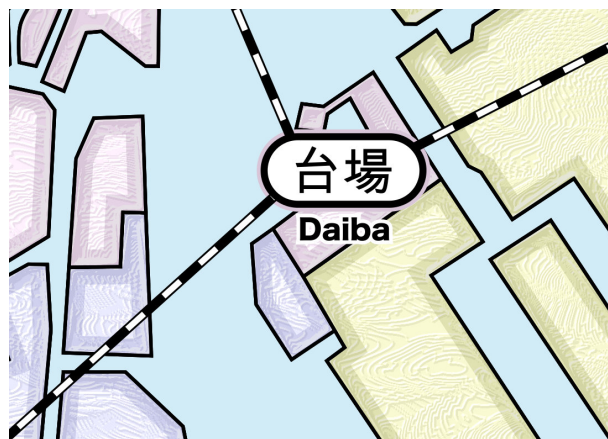

Around Daiba, the current map shows Minato (in pink) adjacent to Koto (yellow). Shinagawa (in purple) is only on the opposite side of the water.

This is the current prototype map:

In fact, the map should show a small portion of Shinagawa (purple) on the island next to Daiba. Because of this, Shinagawa (purple) is adjacent to both Minato (pink) and Koto (yellow).

Here is the updated map:

As mentioned earlier, this will only affect your game if you're playing with an expansion that permits pieces to be moved from one ward to an adjacent one.
